Professional summary

Software engineering student at Metropolia UAS (graduating 2027) building a Kotlin Multiplatform / SwiftUI app in a team placement. Hands-on with CI/CD, automated testing, Android and full-stack web, plus an industrial SCADA client project. Available immediately.

Skills

- **Programming: Python, Java, Kotlin, JavaScript/TypeScript, SQL, Swift (learning)**
- **Web & APIs: React, Node.js, Express, REST APIs, JWT, MongoDB**
- **Mobile: Android, Jetpack Compose, MVVM, Room, Kotlin Multiplatform, TensorFlow Lite**
- **DevOps & testing: Git, GitHub Actions, Jenkins CI/CD, Docker basics, pytest, JUnit, Mockito, SonarQube**
- **Databases: MariaDB (JPA/Hibernate), MongoDB**
- **Cloud & industrial: AWS (AWS Academy cloud computing courses), JSON-SCADA, IEC 104, Raspberry Pi**
- **Practices: Agile/Scrum, documentation, code review, testing**

Certifications

- AWS Academy Graduate – Engineering Operations (2026)
- Cisco Networking Academy – Ethical Hacker (2025)
- IBM SkillsBuild – UX Design Fundamentals (2025)
- Languages: English C2, Vietnamese (native), Finnish A2
- Finnish citizen; full right to work in Finland; available immediately, full-time

Education

Bachelor of Engineering, Information Technology
Metropolia University of Applied Sciences 2023 – 2027 (expected)

- GPA: 4.9/5.0
- Coursework: Design Patterns, Software Engineering Projects 1–2, Advanced Mobile Development (all 5/5)

Bachelor of Hospitality Management
Haaga-Helia University of Applied Sciences 2016 - 2020

Experience

Software Development Intern
Metropolia Software Factory Sep 2026 – present

- Building the iOS version of a carbon-footprint app with Kotlin Multiplatform and SwiftUI: login, sign-up, app overview and further screens.
- Cross-check features with the Android developer to keep both versions consistent.
- Agile team: weekly reports to the project manager and monthly demos; Metropolia's sustainability department will pilot the app.

Restaurant Team Member · Avolta
May 2023 – May 2026

Selected projects

Industrial SCADA — University Client Project
Metropolia UAS / SaveLAN Oy Jan 2026 – May 2026

- Configured JSON-SCADA on a company VM, connected an IEC 104 data source and built an SVG monitoring view for 5 stations, tested with the client's real data. Handed over to SaveLAN Oy for further development.
- Tools: JSON-SCADA, IEC 104, SVG, Linux

data-pipeline — Personal Python Project

- Modular image-collection pipeline built with strategy and protocol patterns; 96% test coverage.
- Tools: Python, pytest, GitHub Actions CI

MushroomHunter — Android ML App
Metropolia UAS · team project, grade 5/5

- Built the app UI (Jetpack Compose), integrated the TensorFlow Lite image-recognition model, and built the map and location features, using MVVM with Room storage.
- Tools: Kotlin, Jetpack Compose, TensorFlow Lite, Room, Maps

Metrade — Full-Stack E-commerce Web App

- Team project, grade 5/5. Built frontend pages and wrote the backend logic connecting them: front page, user-role pages (such as admin), product listing and add-product pages.
- Tools: React, Node.js, Express, MongoDB, JWT
